|------------------|------------------------------|
| Inspection Type: | BOND RELEASE                 |
| Inspection Date: | Thursday, September 28, 2006 |
| Start Date/Time: | 9/28/2006 9:00:00 AM         |
| End Date/Time:   | 9/28/2006 11:45:00 AM        |
| Last Inspection: | Tuesday, September 19, 2006  |

Inspector: Wayne Western, Environmental Scientist III

Weather: Clear skies temp 70s

InspectionID Report Number: 1089

Accepted by: pgrubaug

Friday, September 29, 2006

**Date** 

10/26/2006

Permitee: MOUNTAIN COAL CO
Operator: MOUNTAIN COAL CO

Site: GORDON CREEK 2, 7 & 8 MINES
Address: HC 35 BOX 380, HELPER UT 84526

County: CARBON

Permit Type: PERMANENT COAL PROGRAM

Permit Status: RECLAIMED

**Current Acreages** 

| Mineral Ownership |

Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

The inspection was done as part of the Phase II bond release, Task ID #2591.

In addition, Angela Wadman from the BLM was on site.

Inspector's Signature:

Wayne Western, Environmental Scientist III

Inspector ID Number: 42

Note: This inspection report does not constitute an affidavit of compliance with the regulatory program of the Division of Oil, Gas and Mining.

Permit Number: C0070016 Inspection Type: BOND RELEASE

Inspection Date: Thursday, September 28, 2006

#### REVIEW OF PERMIT, PERFORMANCE STANDARDS PERMIT CONDITION REQUIREMENTS

- 1. Substantiate the elements on this inspection by checking the appropriate performance standard.
  - a. For COMPLETE inspections provide narrative justification for any elements not fully inspected unless element is not appropriate to the site, in which case check Not Applicable.
    b. For PARTIAL inspections check only the elements evaluated.
- 2. Document any noncompliance situation by reference the NOV issued at the appropriate performance standard listed below.
- 3. Reference any narratives written in conjunction with this inspection at the appropriate performace standard listed below.
- 4. Provide a brief status report for all pending enforcement actions, permit conditions, Divison Orders, and amendments.

|      |   | Evaluated | Not Applicable | Comment  | Enforcement |
|------|---|-----------|----------------|----------|-------------|
| 1.   | Permits, Change, Transfer, Renewal, Sale                      |           |                |          |             |
| 2.   | Signs and Markers   |           |                |          |             |

Permit Number: C0070016 Inspection Type: BOND RELEASE

Page 3 of 3 Inspection Date: Thursday, September 28, 2006

#### 4.b Hydrologic Balance: Sediment Ponds and Impoundments

Livestock were grazing the site and had trod a well-worn path to access the ponds and spring.

#### 4.c Hydrologic Balance: Other Sediment Control Measures

The site appeared much as it had during the Phase I bond release inspection three years before. Vegetation is well established. There was no evidence of erosion.

#### 10. Slides and Other Damage

No slides were noted.

#### 12. Backfilling And Grading

The areas that were backfilled and graded appeared to be stable. There was seepage above the #7 mine. The seepage did not appear to cause stability problems.

#### 14. Subsidence Control

No areas within the bond release area were within the subsidence zone.

#### 16.b Roads: Drainage Controls

The Permittee mentioned that rather than remove the series of three ponds prior to final bond release, they would like to leave three ponds in series to provide sediment control for the County road. DOGM representatives mentioned that an application to leave one, two, or three ponds as final reclamation must include a discussion of the liability, water rights, and a justification for the ponds. The series of three ponds at the lower end of the site were observed. The first pond in the sequence is accessible to livestock. It held mud. The second two ponds were dry. The ponds were formed by creating two dikes in the ephemeral channel. Consequently, reclamation of these ponds would entail removal of two dikes and burial of the concrete spillways.
